

VisionOn Technologies Branded SMS Service

We give 100% guarantee of message delivery with no down time.

Now SMS are delivered from your Brand Name or Company Name instead of any unknown number or code. Hence, creates content authenticity of the company message.

Branded sms enables reader to trust the content of your SMS. In other words, we call this "SMS on letter head". The response rate of branded sms is way far better than sms from ordinary number or code. Since this type of sms is generated with SMS gateway and direct connectivity with Teleco SMSC the speed is generally very good i.e. 20 - 30 SMS per second compared with 8-10 SMS per minute from normal SIM Card. Branded SMS generally better suits for commercial organization where reliability of the content really matters. Second most important reason to use branded sms is? It's not forward able i.e. if you receive sms from the header "VisionOn" and you forward that sms to someone with or without any change, the sms will be forwarded from your number instead of "VisionOn" header.
